PCS Questionnaire

(Reference: on Quartana et al. Pain Catastrophizing: A ritical review. Expert Rev Neurother. 2009 May; 9(5):745--758)

Everyone experiences painful situations at some point in their lives. Such experiences may include headaches, tooth pain, joint or muscle pain. People are often exposed to situations that may cause pain such as illness, injury, dental procedures or surgery.

We are interested in the types of thoughts and feelings that you have when you are in pain. Listed below are 13 statements describing different thoughts and feelings that may be associated with pain. Using the following scale, please indicate the degree to which you have these thoughts and feelings when you experience pain.

0 = not at all 1 = to a slight degree 2 = to a moderate degree 3 = to a great degree 4 = all the time

When I'm in pain.....

(H) _____ I worry all the time about whether the pain will end

(H) _____ I feel I can't go on

(H) _____ It's terrible and I think it's never going to get any better

(H) _____ It's awful and I feel that it overwhelms me

(H) _____ I feel I can't stand it anymore

(M) _____ I become afraid that the pain will get worse

(M) _____ I keep thinking of other painful events

(R) _____ I anxiously want the pain to go away

(R) _____ I can't seem to keep it out of my mind

(R) _____ I keep thinking about how much it hurts

(R) _____ I keep thinking about how badly I want the pain to stop

(H) _____ There's nothing I can do to reduce the intensity of my pain

(M) _____ I wonder whether something serious will happen

Physio In The Six Inc.

PELVIC HEALTH PHYSIOTHERAPY CONSENT TO TREATMENT

I hereby consent to the assessment and treatment performed by the Registered Physiotherapist named below.

I understand that treatment may include treatments for therapeutic, preventative, palliative, diagnostic, cosmetic, or other health related purposes.

I understand that to evaluate my condition it may be necessary, initially and periodically, to have my therapist perform an internal pelvic floor muscle examination. This examination is performed by observing and/or palpating the perineal region including the vaginal and/or rectum. This evaluation will assess skin condition, reflexes, muscle tone, length, strength and endurance, scar mobility and function of the pelvic floor region.

I understand that I may rescind or amend this consent in writing.

I further understand that the clinical, psychological and any other information which is gathered during the course of my treatment is confidential, but may be shared with my insuring agents, third party payers and/or physician(s) upon request.

I have read the above consent, and I have had the opportunity to ask questions about its content. This consent will cover the physiotherapy assessment and entire course of treatment.
